

Tau (phospho Ser396) rabbit pAb

Cat#: orb764287 (Manual)

For research use only. Not intended for diagnostic use.

Product Name Tau (phospho Ser396) rabbit pAb

Host species Rabbit

Applications IF;WB;IHC;ELISA

Species Cross-Reactivity Human; Mouse; Rat

Recommended dilutions IF: 1:50-200 WB 1:500-2000, IHC 1:50-300 IHC 1:50-300

Immunogen The antiserum was produced against synthesized peptide derived from

human Tau around the phosphorylation site of Ser396. AA range:681-730

Phospho-Tau (S396) Polyclonal Antibody detects endogenous levels of Tau **Specificity**

protein only when phosphorylated at S396.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium

azide..

Store at -20°C. Avoid repeated freeze-thaw cycles. **Storage**

Protein Name Microtubule-associated protein tau

Gene Name MAPT

Cellular localization

Cytoplasm, cytosol . Cell membrane ; Peripheral membrane protein ; Cytoplasmic side . Cytoplasm, cytoskeleton . Cell projection, axon . Cell projection, dendrite . Secreted . Mostly found in the axons of neurons, in the

cytosol and in association with plasma membrane components

(PubMed:10747907). Can be secreted; the secretion is dependent on protein unfolding and facilitated by the cargo receptor TMED10; it results in protein translocation from the cytoplasm into the ERGIC (endoplasmic reticulum-Golgi intermediate compartment) followed by vesicle entry and secretion

(PubMed:32272059). .

Purification The antibody was affinity-purified from rabbit antiserum by affinity-

epitope-specific immunogen. chromatography using

Polyclonal **Clonality**

Concentration 1 mg/ml

Observed band 50-85kD

Human Gene ID 4137

Human Swiss-Prot Number P10636

MAPT; MAPTL; MTBT1; TAU; Microtubule-associated protein tau; **Alternative Names**

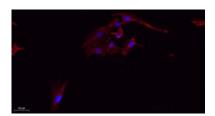

Neurofibrillary tangle protein; Paired helical filament-tau; PHF-tau

Background

This gene encodes the microtubule-associated protein tau (MAPT) whose transcript undergoes complex, regulated alternative splicing, giving rise to several mRNA species. MAPT transcripts are differentially expressed in the nervous system, depending on stage of neuronal maturation and neuron type. MAPT gene mutations have been associated with several neurodegenerative disorders such as Alzheimer's disease, Pick's disease, frontotemporal

dementia, cortico-basal degeneration and progressive supranuclear palsy.

[provided by RefSeq, Jul 2008],

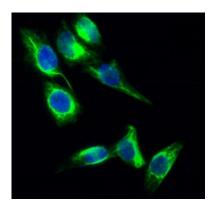

Immunofluorescence analysis of A549. 1,primary Antibody(red) was diluted at 1:200(4°C overnight). 2, Goat Anti Rabbit IgG (H&L) - Alexa Fluor 594 Secondary antibody was diluted at 1:1000(room temperature, 50min).3, Picture B: DAPI(blue) 10min.
