

## IL-8 rabbit pAb

## Cat#: orb765495 (Manual)

For research use only. Not intended for diagnostic use.

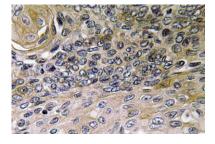

| Product Name             | IL-8 rabbit pAb                                                                                                           |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------|
| Host species             | Rabbit                                                                                                                    |
| Applications             | WB;IHC;IF;ELISA                                                                                                           |
| Species Cross-Reactivity | Human                                                                                                                     |
| Recommended dilutions    | Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. ELISA: 1/20000. Not yet tested in other applications.  |
| Immunogen                | The antiserum was produced against synthesized peptide derived from human IL-8. AA range:19-68                            |
| Specificity              | IL-8 Polyclonal Antibody detects endogenous levels of IL-8 protein.                                                       |
|                          |                                                                                                                           |
| Formulation              | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide                                                    |
| Storage                  | Store at -20°C. Avoid repeated freeze-thaw cycles.                                                                        |
| Protein Name             | Interleukin-8                                                                                                             |
| Gene Name                | IL8                                                                                                                       |
| Cellular localization    | Secreted.                                                                                                                 |
| Purification             | The antibody was affinity-purified from rabbit antiserum by affinity-<br>chromatography using epitope-specific immunogen. |
| Clonality                | Polyclonal                                                                                                                |

| Concentration           | 1 mg/ml                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Background              | The protein encoded by this gene is a member of the CXC chemokine family. This chemokine is one of the major mediators of the inflammatory response. This chemokine is secreted by several cell types. It functions as a chemoattractant, and is also a potent angiogenic factor. This gene is believed to play a role in the pathogenesis of bronchiolitis, a common respiratory tract disease caused by viral infection. This gene and other ten members of the CXC chemokine gene family form a chemokine gene cluster in a region mapped to chromosome 4q. [provided by RefSeq, Jul 2008], |

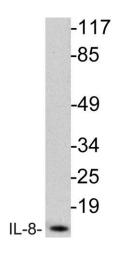

Western Blot analysis of various cells using IL-8 Polyclonal Antibody

Immunohistochemistry analysis of IL-8 antibody in paraffin-embedded human lung carcinoma tissue.

## www.biorbyt.com

Western blot analysis of lysate from HeLa cells, using IL-8 antibody.
