

Chk1 (phospho Ser345) rabbit pAb

Cat#: orb767468 (Manual)

For research use only. Not intended for diagnostic use.

Product Name Chk1 (phospho Ser345) rabbit pAb

Host species Rabbit

Applications IHC;IF;ELISA

Species Cross-Reactivity Human; Mouse; Rat

Recommended dilutions Immunohistochemistry: 1/100 - 1/300. ELISA: 1/10000. Not yet tested in

other applications.

Immunogen The antiserum was produced against synthesized peptide derived from

human Chk1 around the phosphorylation site of Ser345. AA range:310-359

Phospho-Chk1 (S345) Polyclonal Antibody detects endogenous levels of **Specificity**

Chk1 protein only when phosphorylated at S345.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium

azide..

Store at -20°C. Avoid repeated freeze-thaw cycles. **Storage**

Protein Name Serine/threonine-protein kinase Chk1

Gene Name CHEK1

Cellular localization Nucleus . Chromosome . Cytoplasm . Cytoplasm, cytoskeleton, microtubule

organizing center, centrosome. Nuclear export is mediated at least in part by XPO1/CRM1 (PubMed:12676962). Also localizes to the centrosome

specifically during interphase, where it m

Purification The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Explore. Bioreagents.

Clonality Polyclonal

Concentration 1 mg/ml

Observed band

Human Gene ID 1111

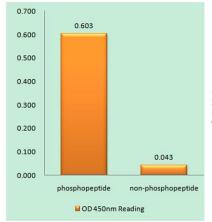

Human Swiss-Prot Number O14757

Alternative Names CHEK1; CHK1; Serine/threonine-protein kinase Chk1; CHK1 checkpoint

homolog; Cell cycle checkpoint kinase; Checkpoint kinase-1

Background

The protein encoded by this gene belongs to the Ser/Thr protein kinase family. It is required for checkpoint mediated cell cycle arrest in response to DNA damage or the presence of unreplicated DNA. This protein acts to integrate signals from ATM and ATR, two cell cycle proteins involved in DNA damage responses, that also associate with chromatin in meiotic prophase I. Phosphorylation of CDC25A protein phosphatase by this protein is required for cells to delay cell cycle progression in response to double-strand DNA breaks. Several alternatively spliced transcript variants have been found for this gene. [provided by RefSeq, Oct 2011],

Enzyme-Linked Immunosorbent Assay (Phospho-ELISA) for Immunogen Phosphopeptide (Phospho-left) and Non-Phosphopeptide (Phospho-right), using Chk1 (Phospho-Ser345) Antibody

Immunohistochemistry analysis of paraffin-embedded human breast carcinoma, using Chk1 (Phospho-Ser345) Antibody. The picture on the right is blocked with the phospho peptide.
