

EGFR (phospho Ser1070) rabbit pAb

Cat#: orb767928 (Manual)

For research use only. Not intended for diagnostic use.

Product Name EGFR (phospho Ser1070) rabbit pAb

Host species Rabbit

Applications WB;IHC;IF;ELISA

Species Cross-Reactivity Human; Mouse; Rat

Recommended dilutions Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. ELISA:

1/20000. Not yet tested in other applications.

Immunogen The antiserum was produced against synthesized peptide derived from

human EGFR around the phosphorylation site of Ser1070. AA range:1041-

1090

Phospho-EGFR (S1070) Polyclonal Antibody detects endogenous levels of **Specificity**

EGFR protein only when phosphorylated at \$1070.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium

azide..

Store at -20°C. Avoid repeated freeze-thaw cycles. **Storage**

Protein Name Epidermal growth factor receptor

Gene Name **EGFR**

Cellular localization

Cell membrane ; Single-pass type I membrane protein . Endoplasmic reticulum membrane ; Single-pass type I membrane protein. Golgi apparatus membrane; Single-pass type I membrane protein. Nucleus membrane;

Single-pass type I membrane protein. Endosome . En

Purification The antibody was affinity-purified from rabbit antiserum by affinity-

epitope-specific immunogen. chromatography using

Clonality Polyclonal

Concentration 1 mg/ml

Observed band 175kD

1956 **Human Gene ID**

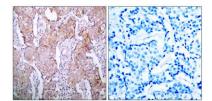

Human Swiss-Prot Number P00533

Alternative Names EGFR; ERBB; ERBB1; HER1; Epidermal growth factor receptor; Proto-

oncogene c-ErbB-1; Receptor tyrosine-protein kinase erbB-1

Background

The protein encoded by this gene is a transmembrane glycoprotein that is a member of the protein kinase superfamily. This protein is a receptor for members of the epidermal growth factor family. EGFR is a cell surface protein that binds to epidermal growth factor. Binding of the protein to a ligand induces receptor dimerization and typosine autophosphorylation and leads to cell preliferation. Mutations in this gene are processed with large leads to cell proliferation. Mutations in this gene are associated with lung cancer. [provided by RefSeq, Jun 2016],

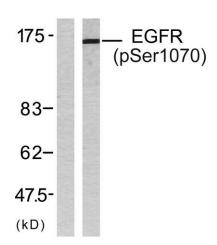

Immunohistochemistry analysis of paraffin-embedded human breast carcinoma, using EGFR (Phospho-Ser1070) Antibody. The picture on the right is blocked with the phospho peptide.
