

MRP-S18A rabbit pAb

Cat#: orb769588 (Manual)

For research use only. Not intended for diagnostic use.

Product Name MRP-S18A rabbit pAb

Host species Rabbit

Applications IHC;IF;ELISA

Species Cross-Reactivity Human; Mouse; Rat

Recommended dilutions Immunohistochemistry: 1/100 - 1/300. ELISA: 1/40000. Not yet tested in

other applications.

Immunogen The antiserum was produced against synthesized peptide derived from

human MRPS18A. AA range:81-130

Specificity MRP-S18A Polyclonal Antibody detects endogenous levels of MRP-S18A

protein.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium

azide..

Storage Store at -20°C. Avoid repeated freeze-thaw cycles.

Protein Name 28S ribosomal protein S18a mitochondrial

Gene Name MRPS18A

Cellular localization Mitochondrion .

Purification The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Clonality Polyclonal

Concentration 1 mg/ml

Observed band 27-30kD

Human Gene ID 55168

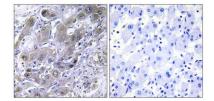

Human Swiss-Prot Number Q9NVS2

MRPS18A; 28S ribosomal protein S18a; mitochondrial; MRP-S18-a; Mrps18a; S18mt-a; 28S ribosomal protein S18-3, mitochondrial; MRP-S18-3 **Alternative Names**

Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein synthesis within the mitochondrion. Mitochondrial **Background**

ribosomes (mitoribosomes) consist of a small 28S subunit and a large 39S subunit. They have an estimated 75% protein to rRNA composition compared to prokaryotic ribosomes, where this ratio is reversed. Another difference between mammalian mitoribosomes and prokaryotic ribosomes is that the latter contain a 5S rRNA. Among different species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. This gene encodes a 28S subunit protein that belongs to the ribosomal protein S18P family. The encoded protein is one of three that has significant sequence similarity to bacterial S18 proteins. The primary

sequences of the three human mitochondria

Immunohistochemistry analysis of paraffin-embedded human liver carcinoma tissue, using MRPS18A Antibody. The picture on the right is blocked with the synthesized peptide.
