

PKC α (phospho Tyr658) rabbit pAb

Cat#: orb769636 (Manual)

For research use only. Not intended for diagnostic use.

Product Name PKC α (phospho Tyr658) rabbit pAb

Host species Rabbit

Applications WB;IHC

Species Cross-Reactivity Human; Mouse; Rat

Recommended dilutions WB 1:500-2000;IHC-p 1:50-300

Immunogen The antiserum was produced against synthesized peptide derived from

human PKC alpha around the phosphorylation site of Tyr657. AA range:623-

672

Specificity Phospho-PKC α (Y657) Polyclonal Antibody detects endogenous levels of

PKC α protein only when phosphorylated at Y657.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium

azide..

Storage Store at -20°C. Avoid repeated freeze-thaw cycles.

Protein Name Protein kinase C alpha type

Gene Name PRKCA

Cellular localization Cytoplasm . Cell membrane ; Peripheral membrane protein . Mitochondrion

membrane; Peripheral membrane protein. Nucleus.

Purification The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Clonality Polyclonal

1 mg/ml Concentration

Observed band 80kD

Human Gene ID 5578

Human Swiss-Prot Number P17252

Alternative Names PRKCA; PKCA; PRKACA; Protein kinase C alpha type; PKC-A; PKC-

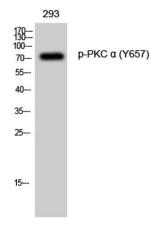

Background Protein kinase C (PKC) is a family of serine- and threonine-specific protein

kinases that can be activated by calcium and the second messenger

diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways.

PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells. The protein encoded by this gene is one of the PKC family members. This kinase has been reported to play roles in many different cellular processes, such as cell adhesion, cell transformation, cell cycle checkpoint, and cell volume control. Knockout studies in mice suggest that this kinase may be a fundamental regulator of cardiac contractility and Ca(2+) handling in myocytes. [provided

Western Blot analysis of 293 cells using Phospho-PKC α (Y657) Polyclonal Antibody diluted at 1:1000

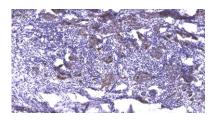

Explore. Bioreagents.

Western blot analysis of lysates from COLO205 cells, using PKC alpha (Phospho-Tyr657) Antibody. The lane on the right is blocked with the phospho peptide.

Immunohistochemical analysis of paraffin-embedded human Breast cancer. 1, Antibody was diluted at 1:200(4° overnight). 2, Tris-EDTA,pH9.0 was used for antigen retrieval. 3,Secondary antibody was diluted at 1:200(room temperature, 45min).
