

Bax (phospho Ser184) rabbit pAb

Cat#: orb769820 (Manual)

For research use only. Not intended for diagnostic use.

Product Name Bax (phospho Ser184) rabbit pAb

Host species Rabbit

Applications IHC;IF;ELISA

Species Cross-Reactivity Human; Mouse; Rat

Recommended dilutions Immunohistochemistry: 1/100 - 1/300. ELISA: 1/10000. Not yet tested in

other applications.

Immunogen The antiserum was produced against synthesized peptide derived from

human Bax around the phosphorylation site of Ser 184. AA range: 143-192

Specificity Phospho-Bax (S184) Polyclonal Antibody detects endogenous levels of Bax

protein only when phosphorylated at S184.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium

azide..

Storage Store at -20°C. Avoid repeated freeze-thaw cycles.

Protein Name Apoptosis regulator BAX

Gene Name BAX

Cellular localization [Isoform Alpha]: Mitochondrion outer membrane; Single-pass membrane

protein . Cytoplasm . Colocalizes with 14-3-3 proteins in the cytoplasm. Under stress conditions, undergoes a conformation change that causes release

from JNK-phosphorylated 14-3-3 prote

Purification The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Clonality Polyclonal

Concentration 1 mg/ml

Observed band

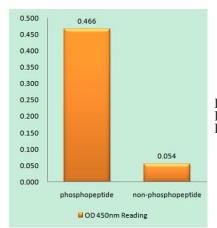

Human Gene ID 581

Human Swiss-Prot Number Q07812

Alternative Names BAX; BCL2L4; Apoptosis regulator BAX; Bcl-2-like protein 4; Bcl2-L-4

Background

The protein encoded by BAX (BCL2 associated X, apoptosis regulator) belongs to the BCL2 protein family. BCL2 family members form hetero- or homodimers and act as anti- or pro-apoptotic regulators that are involved in a wide variety of cellular activities. This protein forms a heterodimer with BCL2, and functions as an apoptotic activator. This protein is reported to interact with, and increase the opening of, the mitochondrial voltage-dependent anion channel (VDAC), which leads to the loss in membrane potential and the release of cytochrome c. The expression of this gene is regulated by the tumor suppressor P53 and has been shown to be involved in P53-mediated apoptosis. Multiple alternatively spliced transcript variants, which encode different isoforms, have been reported for BAX.

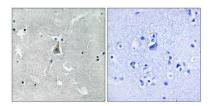

Enzyme-Linked Immunosorbent Assay (Phospho-ELISA) for Immunogen Phosphopeptide (Phospho-left) and Non-Phosphopeptide (Phospho-right), using Bax (Phospho-Ser184) Antibody

Explore. Bioreagents.

Immunohistochemistry analysis of paraffin-embedded human brain, using Bax (Phospho-Ser184) Antibody. The picture on the right is blocked with the phospho peptide.
