

## Tau (Phospho-Ser396) Antibody

Cat#: orb771755 (Manual)

For research use only. Not intended for diagnostic use.

**Product Name** Tau (Phospho-Ser396) Antibody

**Host species** Rabbit

**Applications** WB;ELISA

**Species Cross-Reactivity** Human; Mouse; Rat

**Recommended dilutions** WB 1:500-2000, ELISA 1:10000-20000

**Immunogen** Synthesized phospho derived from human Tau (Phospho-Ser396)

This detects endogenous levels of Tau (Phospho-Ser396) **Specificity** 

**Formulation** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium

azide..

Store at -20°C. Avoid repeated freeze-thaw cycles. **Storage** 

**Protein Name** Microtubule-associated protein tau (Neurofibrillary tangle protein) (Paired

helical filament-tau) (PHF-tau)

MAPT MAPTL MTBT1 TAU Gene Name

Cellular localization

Cytoplasm, cytosol . Cell membrane ; Peripheral membrane protein ; Cytoplasmic side . Cytoplasm, cytoskeleton . Cell projection, axon . Cell projection, dendrite . Secreted . Mostly found in the axons of neurons, in the

cytosol and in association with plasma membrane components (PubMed:10747907). Can be secreted; the secretion is dependent on protein unfolding and facilitated by the cargo receptor TMED10; it results in protein translocation from the cytoplasm into the ERGIC (endoplasmic reticulum-Golgi intermediate compartment) followed by vesicle entry and secretion (PubMed:32272059). .

Explore. Bioreagents.

Purification The antibody was affinity-purified from rabbit antiserum by affinity-

epitope-specific immunogen. chromatography using

**Clonality** Polyclonal

Concentration 1 mg/ml

**Observed band** 50-85kD

**Human Gene ID** 4137

**Human Swiss-Prot Number** P10636

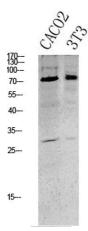

Microtubule-associated protein tau (Neurofibrillary tangle protein) (Paired **Alternative Names** 

helical filament-tau) (PHF-tau)

**Background** 

This gene encodes the microtubule-associated protein tau (MAPT) whose transcript undergoes complex, regulated alternative splicing, giving rise to several mRNA species. MAPT transcripts are differentially expressed in the nervous system, depending on stage of neuronal maturation and neuron type. MAPT gene mutations have been associated with several neurodegenerative disorders such as Alzheimer's disease, Pick's disease, frontotemporal dementia, cortico-basal degeneration and progressive supranuclear palsy.

[provided by RefSeq, Jul 2008],

Western blot analysis of various lysate, antibody was diluted at 1000. Secondary antibody(catalog#:RS0002) was diluted at 1:20000
