

## Product Datasheet

# Vazyme - 3G Taq Master Mix for PAGE (Red Dye) (P115-02)

**Description**

3G Taq Master Mix for PAGE (Red Dye) contains 3G Taq DNA Polymerase, dNTP Mix, visualization red dye and an optimized buffer system. It is convenient to use and causes less pollution, which improves the detection throughput and the results reproducibility. 3G Taq DNA Polymerase has higher inhibitor tolerance and amplification efficiency than wild-type Taq DNA Polymerase. The product contains a visualization red dye, which can directly perform polyacrylamide gel electrophoresis and agarose gel electrophoresis after PCR, thereby simplifying the operation.

**Storage**

Store at -30 ~ -15°C and transport at ≤0°C.

**Note**

For research use only

**Application notes**

Eye-catching colour: Red tracking dye, the colour is more striking  
Convenient operation: Ready-to-use mix; pre-mixed formulation saves time and reduces contamination  
Robust performance: High amplification efficiencies and inhibitor resistance

**Expiration Date**

12 months from date of receipt.
