

## Product Datasheet

# Vazyme - ChamQ SYBR Color qPCR Master Mix (Q411-02)

<b>Description</b>	ChamQ SYBR Color qPCR Master Mix is a special 2 × premix for qPCR assays based on SYBR Green I fluo...
<b>Storage</b>	Store at -30 ~ -15°C and protect from light. Transport at ≤0°C. After thawing, the Master mix can be stored stably for 6 months at 2 ~ 8°C and protected from light.
<b>Note</b>	For research use only
<b>Application notes</b>	Reduce pipetting errors: The components contain special tracer dyes that allow the pipetting process to be tracked by color changes. High efficiency hot-start polymerase: Novel antibody modified hot-start Champagne Taq DNA polymerase with strong amplification performance and high sensitivity. High specificity: The specificity-enhancing factor Exactor inhibits non-specific amplification and primer dimerization to a large extent. Two individual ROX reference dyes of different concentrations can be selected according to the qPCR instrument.
<b>Expiration Date</b>	12 months from date of receipt.
