

Product Datasheet

Vazyme - ChamQ Universal SYBR qPCR Master Mix (Q711-02)

Description ChamQ Universal SYBR qPCR Master Mix is a special premix for qPCR reaction using SYBR Green I chimer...

Storage Store at -30 ~ -15°C and protect from light. Transport at ≤0°C. After thawing, the Master mix can be stored stably for 6 months at 2 ~ 8°C and protected from light.

Note For research use only

Application notes Universal ROX Passive Reference Dye: It is suitable for all qPCR instruments. The concentration of ROX does not need to be adjusted on different instruments. High Efficiency Hot Start Polymerase: Novel antibody modified hot-start Champagne Taq DNA polymerase with strong amplification performance and high sensitivity. High Specificity: The specificity-enhancing factor Exactor inhibits non-specific amplification and primer dimerization to a large extent; High Sensitivity: Templates with single-digit copies can be detected. Compatible with Standard Program and Fast Program.

Expiration Date 12 months from date of receipt.
