

## Product Datasheet

# Vazyme - Taq HS DNA Polymerase (Glycerol-free) (QL101-03)

<b>Description</b>	Taq HS DNA polymerase is a hot-start Taq polymerase obtained by mixing Champagne Taq antibody with T...
<b>Storage</b>	Store at -30 ~ -15°C and transport at ≤0°C.
<b>Note</b>	For research use only
<b>Application notes</b>	Hot-start technology: Superior specificity and sensitivity; convenient room-temperature reaction setup Good Stability: Stable performance after 30 freeze-thaw cycles or store at 4 °C for 4 weeks Robust performance: Higher yield of target amplicons from low template amounts/complex templates Lyophilization: Glycerol-free version of Taq HS DNA polymerase (Biorbyt #P132), which can be used for lyophilization
<b>Expiration Date</b>	12 months from date of receipt.
