

Product Datasheet

Vazyme - HiScript II 1st Strand cDNA Synthesis Kit (R211-01)

Description	This product is 1st strand cDNA synthesis kit based on Vazyme's HiScript II Reverse Transcriptase. I...
Storage	Store at -30 ~ -15°C and transport at ≤0°C.
Note	For research use only
Application notes	Reliable reverse transcription efficiency: It has strong temperature tolerance (50 ~ 55°C), ensuring that the complex secondary structure of RNA can be opened under high temperature conditions to obtain a longer cDNA. Broad template RNA input: Up to 15 kb cDNA can be obtained from 1 pg - 5 µg total RNA. High cDNA synthesis efficiency: Specific Anchored Oligo(dT)23VN, ensuring success and efficiency of cDNA synthesis. Selectable primers: Anchored Oligo(dT)23VN and Random hexamers are available individually packaged.
Expiration Date	Please enquire.
