

Product Datasheet

Vazyme - Anti-mouse IgG for IP (HRP) (RA1009-01)

Description

Anti-mouse IgG for IP (HRP) is a conformation-specific secondary antibody that reacts only with native IgG and does not bind to the denatured and reduced mouse IgG heavy chain or light chain. When performing immunoprecipitation (IP) followed by western blotting, the denatured rabbit IgG light (25 kDa) and heavy (55 kDa) chains of the primary antibody used for IP will not be recognised by Anti-rabbit IgG for IP (HRP), improving the specificity of protein detection.

Storage

Store at -30 ~ -15°C and transport at ≤0°C.

Note

For research use only

Expiration Date

12 months from date of receipt.
