NA Antibody (orb1240161)

Description	NA Antibody
Species/Host	Rabbit
Reactivity	Virus
Conjugation	Unconjugated
Tested Applications	ELISA, WB
Immunogen	Avian influenza hemagglutinin antibody was raised against a synthetic peptide corresponding to 15 amino acids at the amino terminus of the avian influenza hemagglutinin protein. Efforts were made to use relatively conserved regions of the viral sequence as the antigen. The immunogen is located within amino acids 90 - 140 of Avian Influenza Hemagglutinin.
Target	NA
Preservatives	Avian Influenza Hemagglutinin Antibody is supplied in PBS containing 0.02% sodium azide.
Form/Appearance	Liquid
Concentration	1 mg/mL
Storage	Avian Influenza Hemagglutinin antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.
Note	For research use only
Application notes	Avian influenza hemagglutinin antibody can be used for the detection of the avian influenza hemagglutinin protein from the H5N1 strain of avian influenza A in ELISA. It will detect 10 ng of free peptide at 1 µg/mL. Antibody can also be used in western blot applications.
Isotype	IgG
Clonality	Polyclonal
Uniprot ID	Q692M2
NCBI	AAT76166
Dilution Range	Avian influenza hemagglutinin antibody can be used for the detection of the avian influenza hemagglutinin protein from the H5N1 strain of avian influenza A in ELISA. It will detect 10 ng of free peptide at 1 µg/mL. Antibody can also be used in western blot applications.
Expiration Date	12 months from date of receipt
