Description nts. (Ccl7 Antibody (Biotin)
---------------------------	------------------------

Species/Host Goat

Reactivity Mouse

Conjugation **Biotin**

ELISA. WB **Tested**

Applications

Immunogen Produced from sera of goats pre-immunized with highly

pure (>98%) recombinant mMCP-3 (murine MCP-3).

Ccl7 **Target**

Form/Appearance Lyophilized

Concentration batch dependent

Storage MCP-3 antibody is stable for at least 2 years from date of

> receipt at -20°C. The reconstituted antibody is stable for at least two weeks at 2-8°C. Frozen aliquots are stable for at least 6 months when stored at -20°C. Avoid

repeated freeze-thaw cycles.

Note For research use only

Application notes ELISA:Sandwich:To detect mMCP-3 by sandwich ELISA

> (using 100 µL/well antibody solution) a concentration of $0.25 - 1.0 \mu g/mL$ of this antibody is required. This biotinylated polyclonal antibody, in conjunction with our Polyclonal Anti-Murine MCP-3 (XP-5223) as a capture antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant mMCP-3.Western Blot:To detect mMCP-3 by Western Blot analysis this antibody can be used at a concentration of 0.1 - 0.2 $\mu g/mL$. Used in conjunction with compatible secondary reagents the detection limit for recombinant mMCP-3 is 1.5 - 3.0

ng/lane, under either reducing or non-reducing

conditions.

Clonality Polyclonal

Q03366 **NCBI**
