IL17A Antibody (orb1272481)

Description	IL17A Antibody	
Species/Host	Rabbit	To detect hIL-17A by sandwich ELISA (usi...
Reactivity	Human	
Conjugation	Unconjugated	To detect hIL-17A by Western Blot analys...
Tested Applications	ELISA, NeA, WB	
Immunogen	Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant hIL-17 (human Interleukin-17).	To detect hIL-17A by Western Blot analys...
Target	IL17A	
Form/Appearance	Lyophilized	
Concentration	batch dependent	
Storage	IL-17 antibody is stable for at least 2 years from date of receipt at -20°C. The reconstituted antibody is stable for at least two weeks at 2-8°C. Frozen aliquots are stable for at least 6 months when stored at -20°C. Avoid repeated freeze-thaw cycles.	
Note	For research use only	
Clonality	Polyclonal	
Uniprot ID	Q16552	
NCBI	Q16552	
Dilution Range	<p>Neutralization: To yield one-half maximal inhibition [ND50] of the biological activity of hIL-16 (6.00 ng/mL), a concentration of 0.1 - 0.18 µg/mL of this antibody is required. ELISA: To detect hIL-17 by direct ELISA (using 100 µL/well antibody solution) a concentration of at least 0.5 µg/mL of this antibody is required. This antigen affinity purified antibody, in conjunction with compatible secondary reagents, allows the detection of 0.2 - 0.4 ng/well of recombinant hIL-17. To detect hIL-17A by sandwich ELISA (using 100 µL/well antibody solution) a concentration of 0.5 - 2.0 µg/mL of this antibody is required. This antigen affinity purified antibody, in conjunction with our Biotinylated Anti-Human IL-17A as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hIL-17A. Western Blot: To detect hIL-17 by Western Blot analysis this antibody can be used at a concentration of 0.1 - 0.2 µg/mL. Used in conjunction with compatible secondary reagents the detection limit for recombinant hIL-17 is 1.5 - 3.0 ng/lane, under either reducing or non-reducing conditions.</p>	
Expiration Date	12 months from date of receipt.
