## Product Datasheet

### Human Epigen (rHuEPG) (orb1494980)

**Description**

Epigen is an EGF-related polypeptide

receptor-1. It is p...

**Endotoxins**

Less than 1EU/mg of rHuEPG as determined by LAL method.

**Preservatives**

Lyophilized from a 0.2mm filtered concentrated solution in PBS, pH 7.4.

**Form/Appearance**

Sterile Filtered White lyophilized (freeze-dried) powder.

**Storage**

This lyophilized preparation is stable at 2-8°C, but should be kept at -20°C for long term storage, preferably desiccated. Upon reconstitution, the preparation is stable for up to one week at 2-8°C. For maximal stability, apportion the reconstituted preparation into working aliquots and store at -20°C to -70°C. Avoid repeated freeze/thaw cycles.

**Note**

For research use only

**Application notes**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Reconstitute in sterile distilled water or aqueous buffer containing 0.1% BSA to a concentration of 0.1-1.0 mg/mL. Stock solutions should be apportioned into working aliquots and stored at -20°C. Further dilutions should be made in appropriate buffered solutions.

**Protein Sequence**

AVTVTPPITA QQADNIEGPI ALKFSLC  
LE DHNSYCINGA CAFHHELEKA ICRCFTGYTG  
ERCEHLTLTS YA

**Source**

Escherichia coli.

**MW**

Approximately 7.9kDa monomeric protein, containing 72 amino acid residues, which comprises the EGF homologous portion of the Epigen precursor.

**Expiration Date**

6 months from date of receipt.
