| <b>Description</b>         | Human Growth Hormone Inducible Transmembrane Protein (GHITM) ELISA Kit                                                                                                                                                                             |
| <b>Reactivity</b>          | Human                                                                                                                                                                                                                                              |
| <b>Tested Applications</b> | ELISA                                                                                                                                                                                                                                              |
| <b>Note</b>                | For research use only                                                                                                                                                                                                                              |
| <b>Application notes</b>   | Detect Range: 0.312-20 ng/mL. Sensitivity: 0.13 ng/mL. Assay Time: 1-4.5 h. Detection wavelength: 450 nm. Sample Volume: 100 µL. Sample Type: serum, plasma, tissue homogenates, cell lysates, cell culture supernates or other biological fluids. |
| <b>Expiration Date</b>     | Please enquire.                                                                                                                                                                                                                                    |
