

Product Datasheet

Mouse MMA(Methylmalonic Acid) ELISA Kit (orb1736732)

Description

This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Mouse MMA protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse MMA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450 \, \text{nm} \pm 10 \, \text{nm}$. The concentration of Mouse MMA in the samples is then determined by comparing the OD of the samples to the standard curve.

Reactivity Mouse

Range 0.32-20 ng/mL

Concentration 20 ng/mL

Note For research use only

Application notes

standard: 20 ng/mL. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Mouse MMA protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse MMA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Mouse MMA in the samples is then determined by comparing the OD of the samples to the standard curve

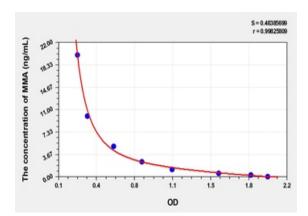

Sample Types serum, plasma and other biological fluids

Sensitivity 0.17 ng/mL

Expiration Date Please enquire.
