

Product Datasheet

20×SYBR Green Dye (orb1736811)

Description	The fluorescence signal of SYBR Green Dye combined with dsDNA can be enhanced 800-1000 times. In the...
Storage	Transport at room temperature, long-term storage at -20 °C, avoid repeated freezing and thawing. It can be placed at 4°C for short-term use
Note	For research use only
Application notes	20×SYBR Green Dye concentrated solution, when used, the concentrated solution can be diluted 20-100 times, so that the final concentration of SYBR Green Dye in the PCR reaction system is 0.5× (adjusted between 0.2× and 1×). For example, to prepare a PCR reaction solution with a total volume of 50 µl, 0.5-2.5 µl of 20×SYBR Green Dye concentrate
Expiration Date	12 months from date of receipt.
