

Product Datasheet

fT3(Free Triiodothyronine) ELISA Kit (orb1806506)

Description fT3(Free Triiodothyronine) ELISA Kit

Reactivity

937.5-60000 fg/mL Range

Target fT3

Note For research use only

Application notes This assay employs the competitive inhibition

> microtiter plate provided in this kit has been pre-coated with Free Triiodothyronine(fT3) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Free Triiodothyronine(fT3). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to

enzyme immunoassay technique. The

each microplate well and incubated. After TMB substrate solution is added. The enzymesubstrate reaction is terminated by the addition of sulphuric acid solution and the color

change is measured spectrophotometrically at

a wavelength of 450nm ± 10nm. The

concentration of Free Triiodothyronine(fT3) in the samples is then determined by comparing the OD of the samples to the standard curve.

Sample Types Serum, plasma and other biological fluids

Sensitivity 258.3 fg/mL

Expiration Date Please enquire.
