

## **Product Datasheet**

## **GnRH(GonadotropinReleasing Hormone) ELISA Kit** (orb1806567)

**Description** GnRH(GonadotropinReleasing Hormone)

ELISA Kit

Reactivity All

**Range** 15.63-1000 pg/mL

Target GnRH

**Note** For research use only

**Application notes** This assay employs the competitive inhibition

enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with GonadotropinReleasing Hormone(GnRH) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-

conjugated antibody specific to

GonadotropinReleasing Hormone(GnRH). Next,Avidin conjugated to Horseradish

Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of  $450 \, \mathrm{nm} \pm 10 \, \mathrm{nm}$ . The concentration of GonadotropinReleasing Hormone(GnRH) in the samples is then determined by comparing the OD of the

samples to the standard curve.

**Sample Types** serum, plasma, tissue homogenates, cell

lysates, cell culture supernates and other

biological fluids

Sensitivity 9.38 pg/mL

**Expiration Date** Please enquire.
