
Product Datasheet

MF-Mouse IL-17A(Interleukin 17A) ELISA Kit (orb1806764)

Description

MF-Mouse IL-17A(Interleukin 17A) ELISA Kit

Reactivity

Mouse

Range

3.13-200pg/mL

Target

IL-17A

Note

For research use only

Application notes

This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse IL-17A. Samples (or Standards) are added to the micro ELISA plate wells and combined with the specific antibody and biotinylated detection antibody specific for Mouse IL-17A. Then Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Mouse IL-17A, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Mouse IL-17A. You can calculate the concentration of Mouse IL-17A in the samples by comparing the OD of the samples to the standard curve.

Sample Types

Serum, Plasma and Tissue homogenate and other biological samples [Sample volume] 25µL

Sensitivity

1.88 pg/mL

Expiration Date

Please enquire.
