

Product Datasheet

Human GHRL(Ghrelin) ELISA Kit (orb1807113)

Description Human GHRL(Ghrelin) ELISA Kit

Reactivity Human

Range 0.16-10ng/mL

Target GHRL

Note For research use only

Application notes This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate

provided in this kit has been pre-coated with Human GHRL. During the reaction, Human GHRL in the sample or standard competes with a fixed amount of Human GHRL on the solid phase supporter for sites on the Biotinylated Detection Ab specific to Human GHRL. Excess conjugate and unbound sample or standard are washed away, and Avidin-Horseradish Peroxidase (HRP) conjugate are added to each micro plate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns from blue to yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The concentration of Human GHRL in tested samples can be calculated by comparing

the OD of the samples to the standard curve.

Sample Types Serum, Plasma, Tissue homogenate and Other biological samples

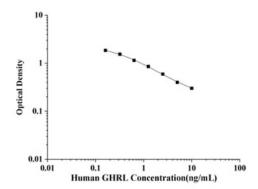

Sensitivity 0.1ng/mL

Expiration Date Please enquire.
