

Product Datasheet

Human Monocyte Chemotactic Protein 4 (MCP-4/CCL13) ELISA Kit (orb1807358)

Description Human Monocyte Chemotactic Protein 4 (MCP-4/CCL13) ELISA Kit

Reactivity Human

Range 15.63-1000pg/mL

Target CCL13

Note For research use only

Application notes This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided

in this kit has been pre-coated with an antibody specific to Human MCP-4/CCL13. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human MCP-4/CCL13 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human MCP-4/CCL13, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The OD value is proportional to the concentration of Human MCP-4/CCL13. You can calculate the concentration of Human MCP-4/CCL13 in the samples by

comparing the OD of the samples to the standard curve.

Sample Types Serum, Plasma, Tissue homogenate and Other biological samples

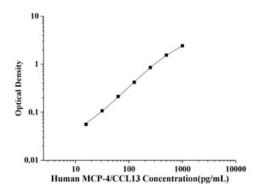

Assay Time 3.5H

Sensitivity 9.38pg/mL

Expiration Date Please enquire.
