

Product Datasheet

Human IL18BP(Interleukin 18 Binding Protein) ELISA Kit (orb1807422)

Description	Human IL18BP(Interleukin 18 Binding Protein) ELISA Kit
Reactivity	Human
Range	0.32-20ng/mL
Target	IL-18BP
Note	For research use only
Application notes	<p>This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human IL18BP. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human IL18BP and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human IL18BP, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of $450 \text{ nm} \pm 2 \text{ nm}$. The OD value is proportional to the concentration of Human IL18BP. You can calculate the concentration of Human IL18BP in the samples by comparing the OD of the samples to the standard curve.</p>
Sample Types	Serum, Plasma, Tissue homogenate and Other biological samples
Sensitivity	0.19ng/mL
Expiration Date	Please enquire.
