Application notes

This antibody is expected to recognise both human isoforms of this protein.ELISA: Peptide ELISA: antibody detection limit dilution 1:32000.WB: Preliminary experiments gave an approx 55kDa band in K562 lysate at 0.5 µg/ml. This band was successfully blocked by incubation with the immunising peptide. Please note that currently we cannot find an explanation in the literature for the band we observe given the predicted size of approx. 41kDa and 27kDa according to NP_036274; NP_411241. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates Have any further splice variants/modified forms been reported
