

Product Datasheet

Porcine FSH(Follicle Stimulating Hormone) ELISA Kit (orb1946426)

Description Porcine FSH(Follicle Stimulating Hormone) ELISA Kit

Reactivity Porcine

Range 6.25-400 ng/mL

Target FSH

Note For research use only

Application notes This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Follicle Stimulating Hormone(FSH) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Follicle Stimulating Hormone(FSH). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm \pm 10 nm. The concentration of Follicle Stimulating Hormone(FSH) in the samples is then determined by comparing the OD of the samples to the standard curve.

Sample Types Serum, plasma and other biological fluids

Sensitivity 2.34 ng/mL

Expiration Date Please enquire.
