

Product Datasheet

Avian bHB(Beta-Hydroxybutyric Acid) ELISA Kit (orb1946564)

Description Avian bHB(Beta-Hydroxybutyric Acid) ELISA

Kit

Reactivity Aves

Range 1.57-100 μ g/mL

Target bHB

Note For research use only

Application notes This assay employs the competitive

inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Beta-Hydroxybutyric Acid(bHB) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Beta-Hydroxybutyric Acid(bHB). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each

microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the

color change is measured

spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Beta-Hydroxybutyric Acid(bHB) in the samples is then determined by comparing the OD of the

samples to the standard curve.

Sample Types serum, plasma, tissue homogenates, cell

lysates, cell culture supernates and other

biological fluids

Sensitivity 0.48 μg/mL

Expiration Date Please enquire.
