

Product Datasheet

Porcine GAGs(Glycosaminoglycan) ELISA Kit (orb1946615)

Description Porcine GAGs(Glycosaminoglycan) ELISA Kit

Reactivity Porcine

Range 1.57-100 ng/mL

Target GAGs

Note For research use only

Application notes This assay employs the competitive inhibition

enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Glycosaminoglycan(GAGs) protein. Standards or samples are added to the appropriate microtiter plate wells then

with a biotin-conjugated antibody specific to Glycosaminoglycan(GAGs). Next,Avidin

Glycosaminoglycan(GAGs). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the

color change is measured

spectrophotometrically at a wavelength of $450 \, \text{nm} \pm 10 \, \text{nm}$. The concentration of Glycosaminoglycan(GAGs) in the samples is then determined by comparing the OD of the

samples to the standard curve.

Sample Types serum, plasma, tissue homogenates, cell

lysates, cell culture supernates and other

biological fluids

Sensitivity 0.51 ng/mL

Expiration Date Please enquire.
