

Product Datasheet

Sheep NKB(Neurokinin B) ELISA Kit (orb1946652)

Description Sheep NKB(Neurokinin B) ELISA Kit

Reactivity Sheep

Range 12.5-800 pg/mL

Target NKB

Note For research use only

Application notes This assay employs the competitive inhibition

enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Neurokinin B(NKB) protein. Standards or samples are added to the

appropriate microtiter plate wells then with a

biotin-conjugated antibody specific to

Neurokinin B(NKB). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzymesubstrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a

wavelength of $450 \text{nm} \pm 10 \text{nm}$. The concentration of Neurokinin B(NKB) in the samples is then determined by comparing the OD of the samples to the standard curve.

Sample Types Serum, plasma and other biological fluids.

Sensitivity 3.17 pg/mL

Expiration Date Please enquire.
