

Product Datasheet

Human TMSβ4(Thymosin Beta 4) ELISA Kit (orb1946817)

Description	Human TMSβ4(Thymosin Beta 4) ELISA Kit
Reactivity	Human
Range	31.25-2000ng/mL
Target	TMSβ4
Note	For research use only
Application notes	<p>This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Human TMSβ4. During the reaction, Human TMSβ4 in the sample or standard competes with a fixed amount of Human TMSβ4 on the solid phase supporter for sites on the Biotinylated Detection Ab specific to Human TMSβ4. Excess conjugate and unbound sample or standard are washed away, and Avidin-Horseradish Peroxidase (HRP) conjugate are added to each micro plate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns from blue to yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm ± 2 nm. The concentration of Human TMSβ4 in tested samples can be calculated by comparing the OD of the samples to the standard curve.</p>
Sample Types	serum, plasma, Tissue homogenate and Other biological samples
Uniprot ID	P62328
Sensitivity	18.75 ng/mL
Expiration Date	Please enquire.
