

Product Datasheet

Human OGP(Osteogenic Growth Peptide) ELISA Kit (orb1946848)

Description Human OGP(Osteogenic Growth Peptide)

ELISA Kit

Reactivity Human

Range 0.16-10ng/mL

Target OGP

Note For research use only

Application notes This ELISA kit uses the Competitive-ELISA

principle. The micro ELISA plate provided in this kit has been pre-coated with Human OGP. During the reaction, Human OGP in the sample or standard competes with a fixed amount of Human OGP on the solid

phase supporter for sites on the

Biotinylated Detection Ab specific to Human

OGP. Excess conjugate and unbound sample or standard are washed away, and Avidin-Horseradish Peroxidase (HRP) conjugate are added to each micro plate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns from blue to yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The concentration of Human OGP in tested samples can be calculated by comparing the OD of the samples to the standard

curve.

Sample Types serum, plasma, Tissue homogenate and

Other biological samples

Sensitivity 0.1 ng/mL

Expiration Date Please enquire.
