Rat MT1(Metallothionein 1) ELISA Kit (orb1947406)

## www.biorbyt.com

Description nts. Rat MT1 (Metallothionein 1) ELISA Kit

Reactivity Rat

**Range** 31.25-2000pg/mL

Target MT1

**Note** For research use only

**Application notes** This ELISA kit uses the Sandwich-ELISA

principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat MT1. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat MT1 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free

components are washed away. The substrate solution is added to each well. Only those wells that contain Rat MT1, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD)

is measured spectrophotometrically at a wavelength of 450 nm  $\pm$  2 nm. The OD value is proportional to the concentration of Rat MT1. You can calculate the concentration of Rat MT1 in the samples by comparing the OD of the

samples to the standard curve.

Sample Types Serum, Plasma, Tissue homogenate and Other

biological samples

Uniprot ID P02803

Sensitivity 18.75pg/mL

**Expiration Date** Please enquire.
