## Product Datasheet

### Mouse SH3YL1(SH3 domain-containing YSC84-like protein 1) ELISA Kit (orb1947798)

**Description**

Mouse SH3YL1(SH3 domain-containing)

**Reactivity**

Mouse

**Range**

0.63-40ng/mL

**Target**

SH3YL1

**Note**

For research use only

**Application notes**

This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse SH3YL1. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Mouse SH3YL1 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Mouse SH3YL1, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm  $\pm$  2 nm. The OD value is proportional to the concentration of Mouse SH3YL1. You can calculate the concentration of Mouse SH3YL1 in the samples by comparing the OD of the samples to the standard curve.

**Sample Types**

serum, plasma, Tissue homogenate and Other biological samples

**Uniprot ID**
**O08641**
**Sensitivity**

0.38 ng/mL

**Expiration Date**
