

Product Datasheet

Human Tumor Necrosis Factor Receptor Superfamily, Member 5 (TNFRSF5) ELISA Kit (orb1948035)

Description Human Tumor Necrosis Factor Receptor Superfamily, Member 5 (TNFRSF5) ELISA

Kit

Reactivity Human

Range 31.25-2000pg/mL

Target TNFRSF5

Note For research use only

Application notes This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided

in this kit has been pre-coated with an antibody specific to Human TNFRSF5. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human TNFRSF5 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human TNFRSF5, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The OD value is proportional to the concentration of Human TNFRSF5. You can calculate the concentration of Human TNFRSF5 in the samples by comparing the

OD of the samples to the standard curve.

Sample Types Serum, Plasma, Tissue homogenate and Other biological samples

Assay Time 3.5H

Uniprot ID P25942

Sensitivity 18.75pg/mL
