

Product Datasheet

Rat HK1(Hexokinase 1) ELISA Kit (orb1948553)

Description Rat HK1(Hexokinase 1) ELISA Kit

Reactivity Rat

Range 31.25-2000pg/mL

Target HK1

Note For research use only

Application notes This ELISA kit uses the Sandwich-ELISA

kit has been pre-coated with an antibody specific to Rat HK1. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat HK1 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added

principle. The micro ELISA plate provided in this

to each well. Only those wells that contain Rat HK1, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The OD value is proportional to the concentration of Rat HK1. You can calculate the concentration of Rat HK1 in the samples by comparing the OD of the samples to the

standard curve.

Sample Types serum, plasma, Tissue homogenate and Other

biological samples

Uniprot ID P05708

Sensitivity 18.75 pg/mL

Expiration Date Please enquire.
