
Product Datasheet

Human PI3K2 α (Phosphoinositide-3-Kinase Class-2-Alpha Polypeptide) ELISA Kit (orb1948711)

Description

 Human PI3K2 α (Phosphoinositide-3-

Kit

Reactivity

Human

Range

3.13-200mIU/mL

Target

 PI3K2 α
Note

For research use only

Application notes

This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human PI3K2 α . Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human PI3K2 α and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human PI3K2 α , biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The OD value is proportional to the concentration of Human PI3K2 α . You can calculate the concentration of Human PI3K2 α in the samples by comparing the OD of the samples to the standard curve.

Sample Types

serum, plasma, Tissue homogenate and Other biological samples

Uniprot ID
000443
Sensitivity

1.88 mIU/mL

Expiration Date

Please enquire.
