## Product Datasheet

### **Rat MPIF2(Myeloid Progenitor Inhibitory Factor 2) ELISA Kit (orb1949988)**

**Description**

Rat MPIF2(Myeloid Progenitor Inhibitory

**Reactivity**

Rat

**Range**

31.25-2000pg/mL

**Target**

MPIF2

**Note**

For research use only

**Application notes**

This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat MPIF2. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat MPIF2 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Rat MPIF2, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm  $\pm$  2 nm. The OD value is proportional to the concentration of Rat MPIF2. You can calculate the concentration of Rat MPIF2 in the samples by comparing the OD of the samples to the standard curve.

**Sample Types**

serum, plasma, Tissue homogenate and Other biological samples

**Sensitivity**

18.75 pg/mL

**Expiration Date**

Please enquire.
