## EasyStep Mouse E2(Estradiol) ELISA Kit (orb1950180)

Description This assay employs the competitive

> inhibition enzyme immunoassay technique. The microtiter plate pro...

Reactivity Mouse

25-1600 pg/mL Range

Note For research use only

**Application notes** This assay employs the competitive

inhibition enzyme immunoassay

technique. The microtiter plate provided in this kit has been pre-coated with Mouse E2 antigen, and the Mouse E2 standard plate wells that pre-coated using protein-related techniques are provided separately. Standard/Sample Diluent Buffer or samples are added to the appropriate microtiter plate wells ,then added a HRP-conjugated antibody specific to Mouse E2 to each microplate well and incubated . After TMB substrate solution is added, the enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color

change is measured

spectrophotometrically at a wavelength of 450nm ±10nm. The concentration of

Mouse E2 in the samples is then determined by comparing the OD of the

samples to the standard curve.

Sample Types Serum

Sensitivity 25 pg/mL

**Expiration Date** Please enquire.
