
Product Datasheet

Glucose-6-Phosphate Dehydrogenase antibody (Biotin) (orb20881)

Description

Biotin-conjugated IgG fraction of

 glucose-6-phosphate
dehydrogenase f...

Species/Host

Rabbit

Conjugation

Biotin

Preservatives

Biotin-coupled hyperimmune rabbit IgG lyophilised from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. No foreign protein added.

Form/Appearance

Biotin-coupled hyperimmune rabbit IgG lyophilised from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. No foreign protein added.

Storage

Storage: The lyophilised conjugate is shipped at ambient temperature and may be stored at +4°C; prolonged storage at or below -20°C. Prior to use, an aliquot is thawed slowly at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the product

Note

For research use only

Clonality

Polyclonal

Source

Glucose-6-phosphate dehydrogenase isolated and purified from baker's yeast. Freund's complete adjuvant is used in the first step of the immunization procedure.

Uniprot ID
