
Product Datasheet

Glyceraldehyde-3-Phosphate Dehydrogenase antibody (Biotin) (orb20885)

Description

Biotin-conjugated IgG fraction of

 glyceraldehyde-3- phosphate
dehydro...

Species/Host

Rabbit

Reactivity

Yeast

Conjugation

Biotin

Tested

DOT, ELISA, ICC, IHC, WB

Applications
Preservatives

 Biotin-coupled hyperimmune
rabbit IgG lyophilised from a
solution in phosphate buffered
saline (PBS, pH 7.2). No
preservative added, as it may
interfere with the antibody
activity. No foreign protein added.

Form/Appearance

 Biotin-coupled hyperimmune
rabbit IgG lyophilised from a
solution in phosphate buffered
saline (PBS, pH 7.2). No
preservative added, as it may
interfere with the antibody
activity. No foreign protein added.

Storage

Storage: The lyophilised conjugate is shipped at ambient temperature and may be stored at +4°C; prolonged storage at or below -20°C. Prior to use, an aliquot is thawed slowly at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the product

Note

For research use only

Clonality

Polyclonal

Source

Glyceraldehyde-3-phosphate
