

Product Datasheet

Rabbit anti Sheep IgM (heavy and light chains), conjugated with FITC (orb21555)

Description Fluorescein isothiocyanate-conjugated IgG fraction of polyclonal rabbit antiserum

to sheep IgM, heavy and light chains. To identify IgM at the cellular and subcellular level by immunofluorescence staining of appropriately treated cell

and tissue substrates, and to demonstrate circulating antibodies in

serodiagnostic microbiology and autoimmune diseases, where IgM and IgG antibodies can be expected. This immunoconjugate is not pre-diluted. The optimum working dilution of each conjugate should be established by titration before being used. Excess labelled antibody must be avoided because it may cause high unspecific background staining and interfere with the specific signal.

Working dilutions are usually between 1:20 and 1:80.

Species/Host Rabbit

Conjugation FITC

Preservatives FITC-coupled purified hyperimmune rabbit IgG lyophilized from a solution in

phosphate buffered saline (PBS, pH 7.2). No preservative added

Form/Appearance FITC-coupled purified hyperimmune rabbit IgG lyophilized from a solution in

phosphate buffered saline (PBS, pH 7.2). No preservative added

Storage The lyophilized conjugate is shipped at ambient temperature and may be stored

at +4°C; prolonged storage at or below -20°C. Prior to use, an aliquot is thawed

slowly in the dark at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH

7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It

will not affect the performance of the immunoconjugate.

Note For research use only

Clonality Polyclonal

Source Purified normal IgM isolated from pooled sheep serum. Freund's complete

adjuvant is used in the first step of the immunization procedure.

Hazard Information This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO,

not for use in diagnostic or therapeutic procedures involving humans or animals. This datasheet is as accurate as reasonably achievable, but Biorbyt accepts no

liability for any inaccuracies or omissions in this information.

Expiration Date 12 months from date of receipt.
