

Product Datasheet

Swine anti Human IgA (Fc specific) (orb21580)

Description	Precipitating polyclonal sheep antiserum to swine, Fc specific. In precipitating techniques as immunoelectrophoresis and radial immunodiffusion to identify the presence of IgA in swine serum or other body fluids or to determine its concentration. To prepare an immune adsorbent for the purification of swine IgA from serum or plasma.
Species/Host	Porcine
Conjugation	Unconjugated
Preservatives	Purified hyperimmune swine lgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity.
Form/Appearance	Purified hyperimmune swine IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity.
Storage	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at - 20°C in small aliquots to prevent freeze-thaw cycles.
Note	For research use only
Clonality	Polyclonal
Source	Purified IgA isolated from human serum. Freund's complete adjuvant is used in the first step of the immunization procedure.
Hazard Information	This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals. This datasheet is as accurate as reasonably achievable, but Biorbyt accepts no liability for any inaccuracies or omissions in this information.
Expiration Date	12 months from date of receipt.
