

Product Datasheet

Goat anti Human IgG Fab (orb21770)

Description	Precipitating polyclonal goat antiserum to mouse fragment antigen binding of IgG. In immunofluorescence techniques as ELISA, DOT BLOT and immunoblotting is done to identify and measure immunoglobulins; as secondary antibody to precipitate the immunoglobulin in normal mouse serum.
Species/Host	Goat
Conjugation	Unconjugated
Preservatives	Purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. No foreign protein added.
Form/Appearance	Purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. No foreign protein added.
Storage	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
Note	For research use only
Clonality	Polyclonal
Source	Purified Fab from normal IgG isolated from pooled human serum. Freund's complete adjuvant is used in the first step of the immunization procedure.
Hazard Information	This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals. This datasheet is as accurate as reasonably achievable, but Biorbyt accepts no liability for any inaccuracies or omissions in this information.
Expiration Date	12 months from date of receipt.
