

Product Datasheet

Goat anti Human C-reactive protein (orb21970)

Description	Goat polyclonal antibody to C-Reactive Protein.
Species/Host	Goat
Conjugation	Unconjugated
Preservatives	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Form/Appearance	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Storage	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
Note	For research use only
Clonality	Polyclonal
Source	C-reactive protein is an acute phase protein, synthesized in the liver. Its molecular weight is about 140,000. It occurs in serum of healthy men in low concentrations, 1.2 µg/ml. In cases of bacterial infection, surgical trauma and Hodgkins disease, he concentration is highly increased. It may reach values of 0.5 mg/ml. Freund's complete adjuvant is used in the first step of the immunization procedure.
Uniprot ID	P02741
Hazard Information	This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals. This datasheet is as accurate as reasonably achievable, but Biorbyt accepts no liability for any inaccuracies or omissions in this information.
Expiration Date	12 months from date of receipt.
