

Product Datasheet

C3C antibody (HRP) (orb21982)

www.biorbyt.com

Descriptionnts. Goat polyclonal antibody against C3C

Species/Host Goat

Reactivity Human

Conjugation HRP

Tested Applications

DOT, ELISA, ICC, IHC, WB

Preservatives Peroxidase-coupled purified hyperimmune IgG

lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2) No preservative added, as it may interfere with the antibody

activity.

Form/Appearance Peroxidase-coupled purified hyperimmune IgG

lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2) No preservative added, as it may interfere with the antibody

activity.

Storage Storage: The lyophilized conjugate is shipped

at ambient temperature and may be stored at +4°C; prolonged storage at or below -20°C. Prior to use, an aliquot is thawed slowly at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. If a slight precipitation occurs upon storage, this should be removed by

centrifugation. It will not affect the performance of the immunoconjugate

Note For research use only

Clonality Polyclonal

Source C3c is the major fragment resulting from C3

cleavage by C3 convertase and factor I. It is composed of an intact beta chain bound to two fragments of the alpha chain. C3c is isolated and purified from pooled normal human serum. Freund's complete adjuvant is used in the first

step of the immunization procedure.

Uniprot ID P01024

Hazard This product is intended FOR RESEARCH USE **Information** ONLY, and FOR TESTS IN VITRO, not for use in
