Goat IgG Fab Human IgG Fab (FITC) antibody (orb22045)

biorbyt

www.biorbyt.com

Descriptionnts.

Precipitating polyclonal sheep

precipitating techniques as

	immunoele
Species/Host	Goat
Reactivity	Human
Conjugation	FITC
Preservatives	FITC-coupled goat F(ab)2 antibodies lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added.
Form/Appearance	FITC-coupled goat F(ab)2 antibodies lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added.
Storage	Storage: The lyophilized conjugate is shipped at ambient temperature and may be stored at +4°C; prolonged storage at or below -20°C. Prior to use, an aliquot is thawed slowly in the dark at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the immunoconjugate
Note	For research use only
Clonality	Polyclonal
Source	Purified Fab prepared from normal IgG isolated from pooled human serum. Freund's complete adjuvant is used in the first step of the immunization procedure.
Hazard Information	This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals. This datasheet is as accurate as reasonably achievable.
