

Product Datasheet

Goat Guinea Pig IgG (heavy and light chains) antibody (orb22053)

Description

Precipitating polyclonal goat

heavy and light chains. Human
standa...

Species/Host

Goat

Conjugation

Unconjugated

Preservatives

Delipidated, heat inactivated
lyophilized stable whole serum No
preservative added, as it may
interfere with the antibody activity.
No foreign protein added. Total
protein and IgG concentration in the
antiserum are comparable to those
of pooled goat serum

Form/Appearance

Delipidated, heat inactivated
lyophilized stable whole serum No
preservative added, as it may
interfere with the antibody activity.
No foreign protein added. Total
protein and IgG concentration in the
antiserum are comparable to those
of pooled goat serum

Storage

Storage: The lyophilized antiserum
is shipped at ambient temperature
and may be stored at +4°C;
prolonged storage at or below -
20°C. Working dilutions are
prepared by adding sterile
phosphate buffered saline (PBS, pH
7.2). Repeated thawing and freezing
should be avoided. Working
dilutions should be stored at +4°C,
not refrozen, and preferably used
the same day. If a slight
precipitation occurs upon storage,
this should be removed by
centrifugation. It will not affect the
performance of the product

Note

For research use only

Clonality

Polyclonal

Source

Purified normal IgG isolated from
pooled guinea pig serum. Freund's
complete adjuvant is used in the
first step of the immunization
procedure.

Usage

This product is intended FOR
